

AERO: MAIN FEATURES AND USP's

AERO Bench is a Waiting Areas, Passenger Terminals, Churches and Funeral Homes, Hospitals, Auditorium, etc. Bench program designed by Lievore Altherr Molina that offers infinite options in models, dimensions and finishes.

The main **USP's** of AERO are:

- **Design:**
 - The design of AERO is based on 2 basic concepts: elegance and visual lightness.
 - Renowned design with multiple international awards: “Best of Neocon” or “First Prize SIDI Colectividades Siglo XXI” among others.
 - Timeless design that gives AERO Bench the “modern classic” qualification.
- **Complete Family:** AERO Bench offers different models (with backrest, backless, fixed to tier), different lengths (from 2 to 7 seaters) and different finishes (aluminium, compact, wood, polyurethane and upholstered).
- **Space adaptation:** its innovative design, apparently simple, allows it to integrate into all type of spaces: Waiting Areas, Terminals, Auditoriums, Churches, Funeral Homes, etc.
- **Outdoor and Indoor use:** the materials used (aluminium and stainless steel) allow the use of AERO Bench both outdoor and indoor.

Materials:

- Legs: Stainless Steel and Aluminium
- Shell: Aluminium or Compact. Wooden, Polyurethane and Upholstered Pads are optional.
- Armrests: Aluminium, Wood, Polyurethane or Upholstered.

Models: AERO Bench with backrest, backless, fixed to tier and AERO Bench in Compact

Spaces where fits perfectly:

- **Waiting Areas**
- **Passenger Terminals**
- **Churches and Funeral Homes**
- **Auditoriums**
- **Hospitals**
