

SWING: MAIN FEATURES AND USP's

SWING is a Work Space Chair collection, designed by Burkhard Vogtherr and Markus Dörner. It is composed by 3 models (SWING, SWING Conference and SWING Relax), offering each of them customization options (different bases and different armrests).

The main **USP's** of SWING are:

- **Wide range of options:** 6 different bases (4 stainless steel and 2 aluminium) and 2 armrest options (stainless steel or upholstery) can be chosen in each of the 3 models offered by the system.
- **Innovative design:** the link between the stainless steel base and the shell is a challenge that has been successfully overcome. It has achieved to link an aesthetic beauty with functionality, obtaining an apparently impossible solution.
- **Adjustments:**
 - Height adjustment.
 - Pivoting Adjustment Innovative System.

Materials:

- Frame: Stainless Steel or Coated Steel or Aluminium
- Shell: Upholstered
- Armrests: Stainless Steel or Coated Steel or Upholstered

Models: different versions are offered.

Spaces where fits perfectly:

- **Offices**
- **Coworking spaces**
